New Animated Video from Eriez® Features Dry Vibrating Magnetic Filters

Dry Vibrating Magnetic Filter

Erie, PA—A new animated [video](#) produced by [Eriez®](#) offers an up-close look at [Dry Vibrating Magnetic Filters \(DVMF\)](#), which are used to remove fine paramagnetic contaminants from dry powders for pharmaceutical, cosmetic, abrasives, specialty glass, specialty metallic powder and industrial minerals applications. The video is now available on the company's YouTube channel: <https://www.youtube.com/eriez>.

This [video](#) runs approximately three minutes and provides an animated view of the inner workings of these state-of-the-art filters while in operation. It explains that the exceptionally high-intensity field of up to 5,000 gauss that is generated by the electromagnet facilitates peak separation efficiency.

The informative [video](#) illustrates how iron-bearing contaminants are captured as material flows through the magnetized elements, resulting in a high-purity product. The closing animation demonstrates the simple steps for cleaning the magnet.

For more information about Dry Vibrating Magnetic Filters, visit <http://www.eriez.com/Products/Index/Dryvibratingmagneticfilters>. To watch the DVMF animation, go to <http://erieznews.com/nr406>.

Eriez is recognized as world authority in separation technologies. The company's magnetic lift and separation, metal detection, fluid filtration, flotation, materials feeding, screening, conveying and controlling equipment have application in the process, metalworking, packaging, plastics, rubber, recycling, food, mining, aggregate and textile industries. Eriez manufactures and markets these products through 12 international facilities located on six continents. For more information, call toll-free (888) 300-ERIEZ (3743) within the U.S. and Canada. For online users, visit www.eriez.com or send email to eriez@eriez.com. Eriez World Headquarters is located at 2200 Asbury Road, Erie, PA 16506.
